## B. Deskripsi Program

### **struct queue :**

Berisikan data-data program dari queue implementasi linkedlist

### **struct data :**

Berisikan data-data program dari queue implementasi array

### **void baru ;**

Untuk memulai node secara linkedlist

### **void tambah :**

Untuk menambah node secara linkedlist

### **void hapus :**

Menghapus node secara linkedlist

### **void tunjukdata :**

Menunjuk data front dan rear

### **void showlist :**

Menampilkan data dari queue linkedlist

### **void tambahArray :**

Menambah data secara array

### **void tunjukDataArray ;**

menunjuk data front dan rear

### **void hapusArray :**

menghapus data secara array

### **void displayArray :**

Menampilkan data queue array

### **void linkedlistIm ;**

proses queue implementasi linkedlist

### **void arrayimp :**

proses queue implementasi array

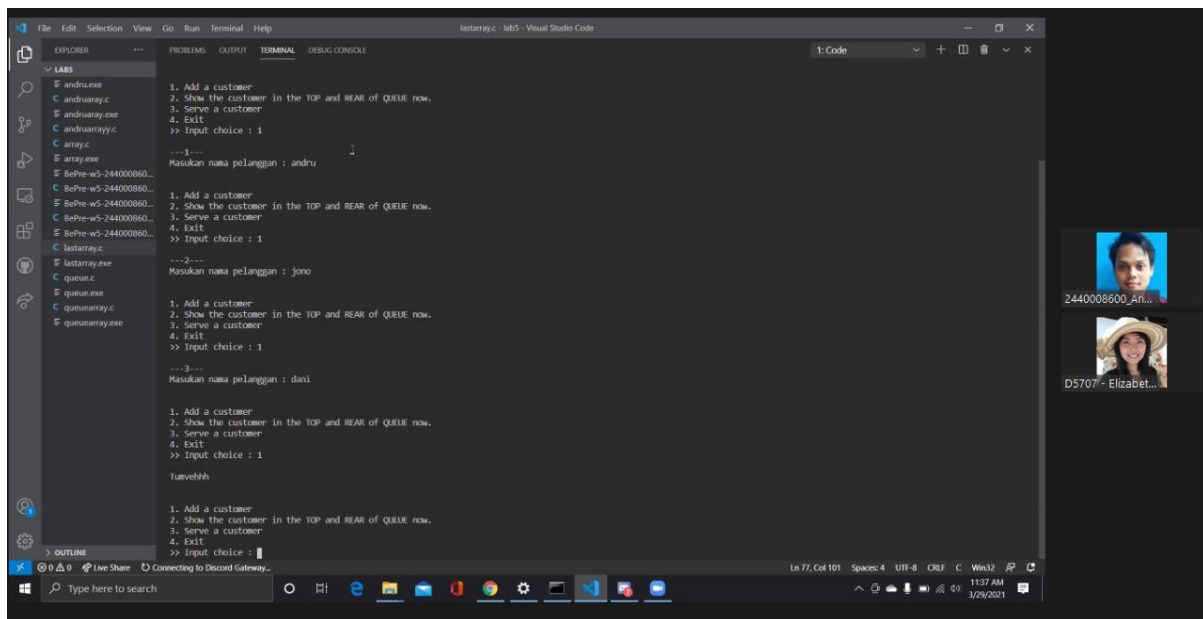

### **void installcustom :**

hanya sebagai hiasan agar terkesan sedang mendownload aplikasi melalui terminal

### **main program :**

User akan diberi 2 pilihan, yakni mendownload aplikasi queue berbasis linkedlist Atauapun array. Jika user memilih aplikasi berbasis linkedlist, maka program akan Menjalankan proses dengan memanggil fungsi linkedlistimp(). Jika user memilih array, Maka program akan menjalankan proses dengan memanggil fungsi arrayimp();

## C. Bukti Presentasi

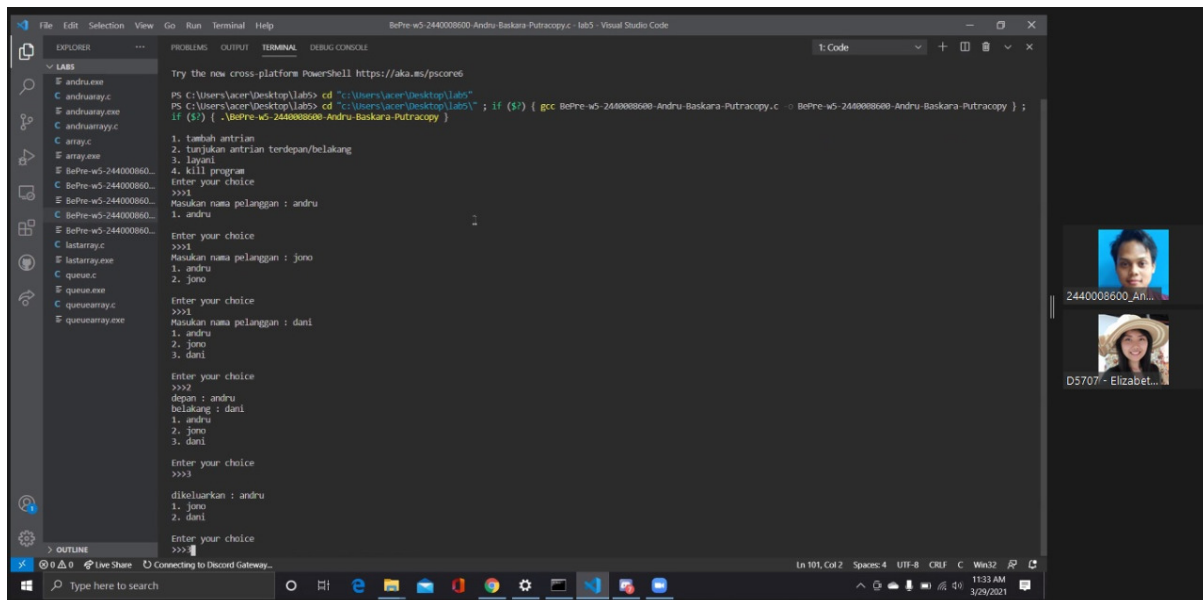

```
1. Add a customer
2. Show the customer in the TOP and REAR of QUEUE now.
3. Serve a customer
4. Exit
>> Input choice : 1
---1---
Masukan nama pelanggan : andru

1. Add a customer
2. Show the customer in the TOP and REAR of QUEUE now.
3. Serve a customer
4. Exit
>> Input choice : 1
---2---
Masukan nama pelanggan : jono

1. Add a customer
2. Show the customer in the TOP and REAR of QUEUE now.
3. Serve a customer
4. Exit
>> Input choice : 1
---3---
Masukan nama pelanggan : dani

1. Add a customer
2. Show the customer in the TOP and REAR of QUEUE now.
3. Serve a customer
4. Exit
>> Input choice : 1
Tamatvhhh

1. Add a customer
2. Show the customer in the TOP and REAR of QUEUE now.
3. Serve a customer
4. Exit
>> Input choice : 1
